Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40 drawn to an image input apparatus comprises an image capture guide list input unit, through which image capture guide lists including at least one of image titles representing targets to be recoded are input; and an image title display unit displays the image titles. Classified in class 348, subclass 231.2 and 333.02.
- II. Claims 41-49 drawn to an image input apparatus comprises a Web browsing unit which captures Web information for a Web page of a Web server. Classified in class 348, subclass 211.3 and class 709, subclass 217.
- III. Claims 50-60 drawn to a computer connected with an image input apparatus and a method for creating an image capture guide list. Classified in class 348, subclass 207.1 and 207.11.

2. The inventions are distinct, each from the other because of the following reasons:

In the instant case, invention as claimed in **Group I** only teaches an image input apparatus comprises image capture guide list input unit, through which image capture guide lists including at least one of **image titles**, which does not include a Web browsing unit which captures **Web information** for a Web page of a Web server as claimed in **Group II**, and which does not include a **computer** connected with an image input apparatus and a

Art Unit: 2615

method for creating an image capture guide list as claimed in **Group III**. This same reasoning could be performed for all of the groups. See MPEP § 806.05(d).

3. In the event **Group I** is elected, Group I is subject to the following additional restriction requirement:

Group I contains claims directed to the following patentably distinct sub-species of the claimed invention: **figure 35; figure 38; figure 39; figure 40; figure 42; figure 44; figure 45; figure 46; figure 48; figure 49; figure 50; figure 51; figure 52; figure 53; figure 54; figure 56; figure 57; figure 60; figure 61; figure 62.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no independent claims are generic claims.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
